

BA4320

The BA4320 rolled coin dispenser offers a flexible and convenient solution for the exchange of high denomination notes and rolled coins.

Perfect for banks, other financial institutions, transport and retail outlets; the BA4320 is able to dispense up to 6 silos of rolled coin in a single transaction, along with the option for banknotes.

FEATURES

- Designed to accommodate up to 6 coin silos; offering customised coin handling and greater fault tolerance.
- Onboard monitoring system verifies live operational status and flags issues in real time, preserving customer satisfaction and keeping downtime to a minimum.
- With enhanced security features, branches and customers alike can conduct transactions with minimised cash exposure. Receipt slip issued with each deposit.
- Large touchscreen completes a user-friendly interface, making transactions easy to conduct.

Exclusive Sprintquip Options

➤ RAM RAID NEUTRALISER

Patented by SprintQuip, the Ram Raid Neutraliser is a high quality steel plate specially designed to absorb the shock of a ram raid attack, ensuring your machine stays attached to the ground regardless of the direction of the attack, or number of hits received.

➤ ELECTRONIC LIFTING FRAME (ELF)

To reduce the physical strain of loading of coins into the silo, an auto-lift elevating platform can be supplied with this device or can be retrofitted to existing machines. The ELF was designed for easy replenishing and filling of the machine. It alleviates the need to reach above a safe working height to fill the machine. By the press of a button, the ELF lowers the mechanism to a comfortable level for filling. Once machine has been stocked with rolled coins, it can be raised by pushing a button.

➤ FILE TRANSFER UTILITY

Configured for retrieving audit and event history files.

Dimensions: Width: 668mm / Depth: 1050mm / Height: 1836mm

Net Weight: 385Kg
