

BOLD

BOLD

BOLD

Design — Studio Kees

It doesn't take gaudy or pretentious to attract attention. Strong lines, oblique angles, an element of motion and a hidden source of light make Bold a true statement. Bold was designed in close collaboration with the Rotterdam-based design Studio Kees.

A paradox in luminaires

Inspired by the works of Escher as well as some of the most fearless architectural feats of modern times, Bold manipulates perspective to blend in and stand out at the same time. A Bold fixture is the epitome of daring while playing in harmony with the other stylistic elements of your residential or hospitality space.

Audacious from every angle

Bold can be mounted to a wall in a vertical or horizontal position and flipped around 180°, even after installing the wall plate. The shape and light effect also change, depending on perspective. The single light source is artistically hidden, and points to the wall on which the frame is installed.

No visible screws

Installation is a simple process. Thanks to a flush-fitted magnetic cover plate, fixation of the screws can be done inside the fixture. No screws will be visible. Thin design gap visible along one side.
