PUPIL

Design — Bleijh

Nothing short of the unexpected, Pupil is full of surprises and contradictions. Using nature as his muse, Dutch designer Basten Leijh created this organic, quirky shape: the downlighter that does the opposite. Nonconformity and functionality blend beautifully in this family, and there's even more to it than meets the eye.

A design that stands out

Small and curvy, the oval shape ends abruptly, cut off at an angle. An organic design inspired by the curious eyes of a crab, Pupil is not for a discreet expression. It demands attention. Unlike most recessed downlights, it playfully sticks out of the ceiling.

Straight that isn't straight

The asymmetry and adjustability of Pupil create optical puzzles that will make expressions have expressions. The light beam and the position of the housing simply can't agree. For a light beam pointing straight down, tilt the housing slightly up. For a 30° beam angle, point the housing straight down. Tilt the body 30°, and you have 60° light orientability for a wall-wash effect.

Fitting in

Just as this new design fits perfectly with the miniaturization trend, Pupil fits right in the palm of your hand. Pupil's playful design is additionally complemented by a brilliant show of modularity. It works wonders with our established, iconic K family, our first-ever adventure into technical architectural lighting. Thanks to K-set 72's openings, Pupil settles in snugly inside as alternative to a K-72 spot. Or, a duo, trio or even a quartet of Pupils, all in one plate!
