

PISTA LINEAR SPOTS

When you look up to see what's giving small, charming light bursts underneath our slim rail, you'll see it: a trail of tiny but powerful LED spots. As they are fully integrated in the profile, nothing sticks out beneath. Available in units of 8x and 16x, in black and white structure, the spots enable designers to create accents using a linear module, and still enjoy Pista's streamlined design. Choose between 2 beam angles, medium or flood, and 1-10V or DALI dimming systems.

16 linear spots

Pista's popular linear spots just got longer - from 8x to 16x - and more powerful. With 1800 lm, and a UGR below 19, this makes Pista an original and elegant choice for office applications. Only style - and nothing else - sticks out with this charming trail of accent lights; Pista keeps its streamlined shape. A perfect luminaire for highlighting objects or the architectural features of a space.
