Installation Instruction

IP54

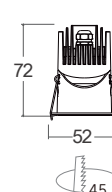

Please read these instructions carefully before commencing installation and retain for reference. The fitting and driver must not be modified, doing so may invalidate the warranty and render the product unsafe. Must be installed by qualified electrician in accordance to AS/NZ 3000.

Important Safety Notes

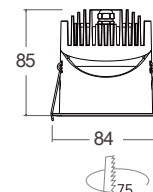

- Disconnect supply before commencing installation
- Connect to 220-240v supply ONLY with suitable driver
- Ensure all connections are tight with no loose strands
- Ensure fire regulations are not breached when installed
- If in doubt seek advice from supplier

Warning

- IP20 interior and suitable IP54 use only
- Dispose of packing safely, recycle suitable items
- Do not use if cable is defective
- Do NOT connect directly to 240v mains. Use suitable supplied CC driver
- Do not look directly at lit LED
