

Considered the most advanced LED strip type, SMD2835 LED strips has the same size as the 3528 chip. In a nutshell, this chip is a re-engineered 3528 LED with an increased light-emitting surface area and better heatsinks which allows 2 to 3 times more light output than the 3528 chip.

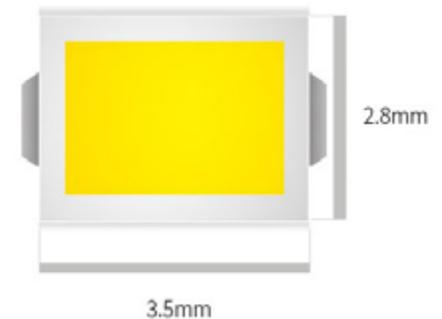

Designed for better heat dispersion, superior reliability and longer life, the 2835 strip is recommended to work with aluminium extrusions for task lighting, backlighting, garage lighting, under cabinet lighting, bar lighting and general linear lighting in offices or domestic applications. We also offer splashproof IP65 and waterproof IP68 options.

Features

- Super flexible form that'll stick to just about anything*
- Over 70 type of aluminium extrusions including flush and surface mounted as well as suspension options for housing the strips

*Wipe dry the extrusion using a lint-free cloth before installation, peel back the tape backing and stuck in place using a static glove. Correct installation of this product requires a few dabs of silicon along the length to hold it in place. The glue is normally enough, but sometimes it doesn't stick so well to the paint and so we recommend a little dab of silicon every 20cm or so on each side of strip in a zig-zag pattern.

LED Strip Light SMD2835

Product Code	BLSP-2835-120	BLSP-2835-120-WP	BLSP-2835-120-IP68
Power (W)	20W/m		
Luminous FLux(lm)	1700lm/m		
IP Rating*	IP20	IP65	IP68
CCT	Warm White 3000K, Neutral White 4000K, Cool White 6000K		
Connect	Insulated Cable		
Dimming Options	Various dimming options available on request		
Dimensions(mm)	8*1000		
Weight(kg)	0.1	0.2	0.3

*Ingress Protection 20 (IP20) which means they are suitable ONLY for all indoor dry applications. However, you can use an IP65 or IP68 rated LED strips and power supply to add protection against moisture for areas that get wet or overly humid.
