

THE ROAD TO WEMBLEY

 PRESTON

THE ROAD TO WEMBLEY

The Bridge in this brochure is for workers and the public to access the site office and amenities on one side to access the construction site on the other side of the road.

SUPERACCESS

Preston is a leader in providing smart innovative specialised construction equipment to the Australian and International construction sector for over 50 years. **superAccess** is a multi-purpose engineered innovative smart Australian patented world wide access system designed and manufactured to significantly **increase safety and productivity** while reducing cost on site and to end users.

Through Preston's astute and progressive approach to business, Preston has, since 1969, continually expanded its distribution network outside of Australia while it focuses on its core business of carefully designing and engineering access systems and other products to suit today's project and builder demands and Workers and Public Access requirements. Preston's focal point is not only meeting the standard in compliance laws and regulations but setting the standard by exceeding safety requirements on each product through careful smart design and engineering.

SUPERACCESS EMPHASISES ON EFFICIENCY AND VALUE-ENGINEERING

BUSINESS OPPORTUNITY - EXPRESSION OF INTEREST - PURCHASE OF PATENT WORLDWIDE

INTRODUCTION

SUPERACCESS is a multi-function innovative access product designed and manufactured using galvanised rigid boxes to erect engineered structures for safe access.

superAccess is an intelligent, versatile and multi-purpose product which has brought superior safety, increased productivity and cost savings to the many clients that have chosen it over other out-of-date and overcomplicated access systems.

The biggest continued benefits our clients see on their sites are reduced labour **ON-SITE** and cost, and a significant **increase in levels of safety**. The main reason superAccess boasts these impressive benefits and greatly reduces risk on site is that all products are pre-assembled **OFF-SITE** and can be positioned into place and ready to use **ON-SITE** in just hours, not weeks.

Take a look at our product range and see how we can be of benefit to you by reducing your **ON-SITE** risk and greatly improving safety **ON-SITE**.

An aerial view of a construction site where a large, rectangular metal cage is being hoisted by a crane. The cage is made of galvanized steel with welded lifting lugs at the corners. It is suspended by four heavy chains. Below the cage, a platform of similar metal structure is visible, with several workers in orange safety gear standing on it. In the background, a white truck with a crane arm is parked on a street. Various construction materials and equipment are scattered around the site. A banner with the text 'THE EN FARM ONE TR' is visible on the right side of the image.

SUPERACCESS MODULAR BOX CONSTRUCTION

SUPERACCESS SUPPORT STAIR TOWERS

SUPERACCESS Tower is your answer for quick and safe access for supporting or shoring heavy loads and is ideal for infrastructure, building sites, excavation holes, elevated road, lift shafts or any other use.

SUPERACCESS is a self-supporting tower which can be configured to any size, shape or height.
From systems with no stairs to zig zag stair towers and heavy duty support towers,
this is a builder's dream come true.

SUPERACCESS is constructed with superAccess boxes built one on top of another to any configuration to help you solve your heavy-duty support or access problems. **superAccess modular box construction** is unique and is an innovative approach to reducing labour **ON-SITE**, decreasing the number of accidents and increasing productivity

SUPERACCESS is **MECCANO** and **LEGO** put together.

18mm HOLE | M16 BOLT

A close-up, low-angle shot of a metal framework, likely part of a bridge or industrial structure. The framework consists of thick, dark metal beams connected by numerous bolts. A prominent vertical beam in the center has a series of circular holes spaced evenly along its length. To the right, a section of the structure is covered with a fine, diamond-shaped metal mesh. In the background, a tall, modern skyscraper with a glass facade is visible against a clear blue sky. The lighting is bright, suggesting a sunny day.

SUPERACCESS BRIDGE AND STAIRS

SUPERACCESS bridge is designed to provide a quick temporary bridge solution for your project and need for the public and/or worker access on site. SUPERACCESS revolutionary innovation offers solutions to many issues and problems which often occur with other bridge and stair methods.

SUPERACCESS bridge system can dramatically increase productivity, ease of access and safety levels for the public and for **ON-SITE** staff, saving builders time and money. SUPERACCESS bridge can be custom made to suit your requirements on site, whether this be for public access, motor vehicle use, machinery movement and/or site worker access. It can be weather proof and provides 10Kpa roof protection.

Your imagination is the only limit to the multiple use of SUPERACCESS

NIGHT OR DAY WORK WITH SUPERIOR SAFETY

WORKING AT NIGHT DUE TO TRAFFIC

**BRIDGE LIFTED IN ONE SECTION
READY TO USE IN MINUTES**

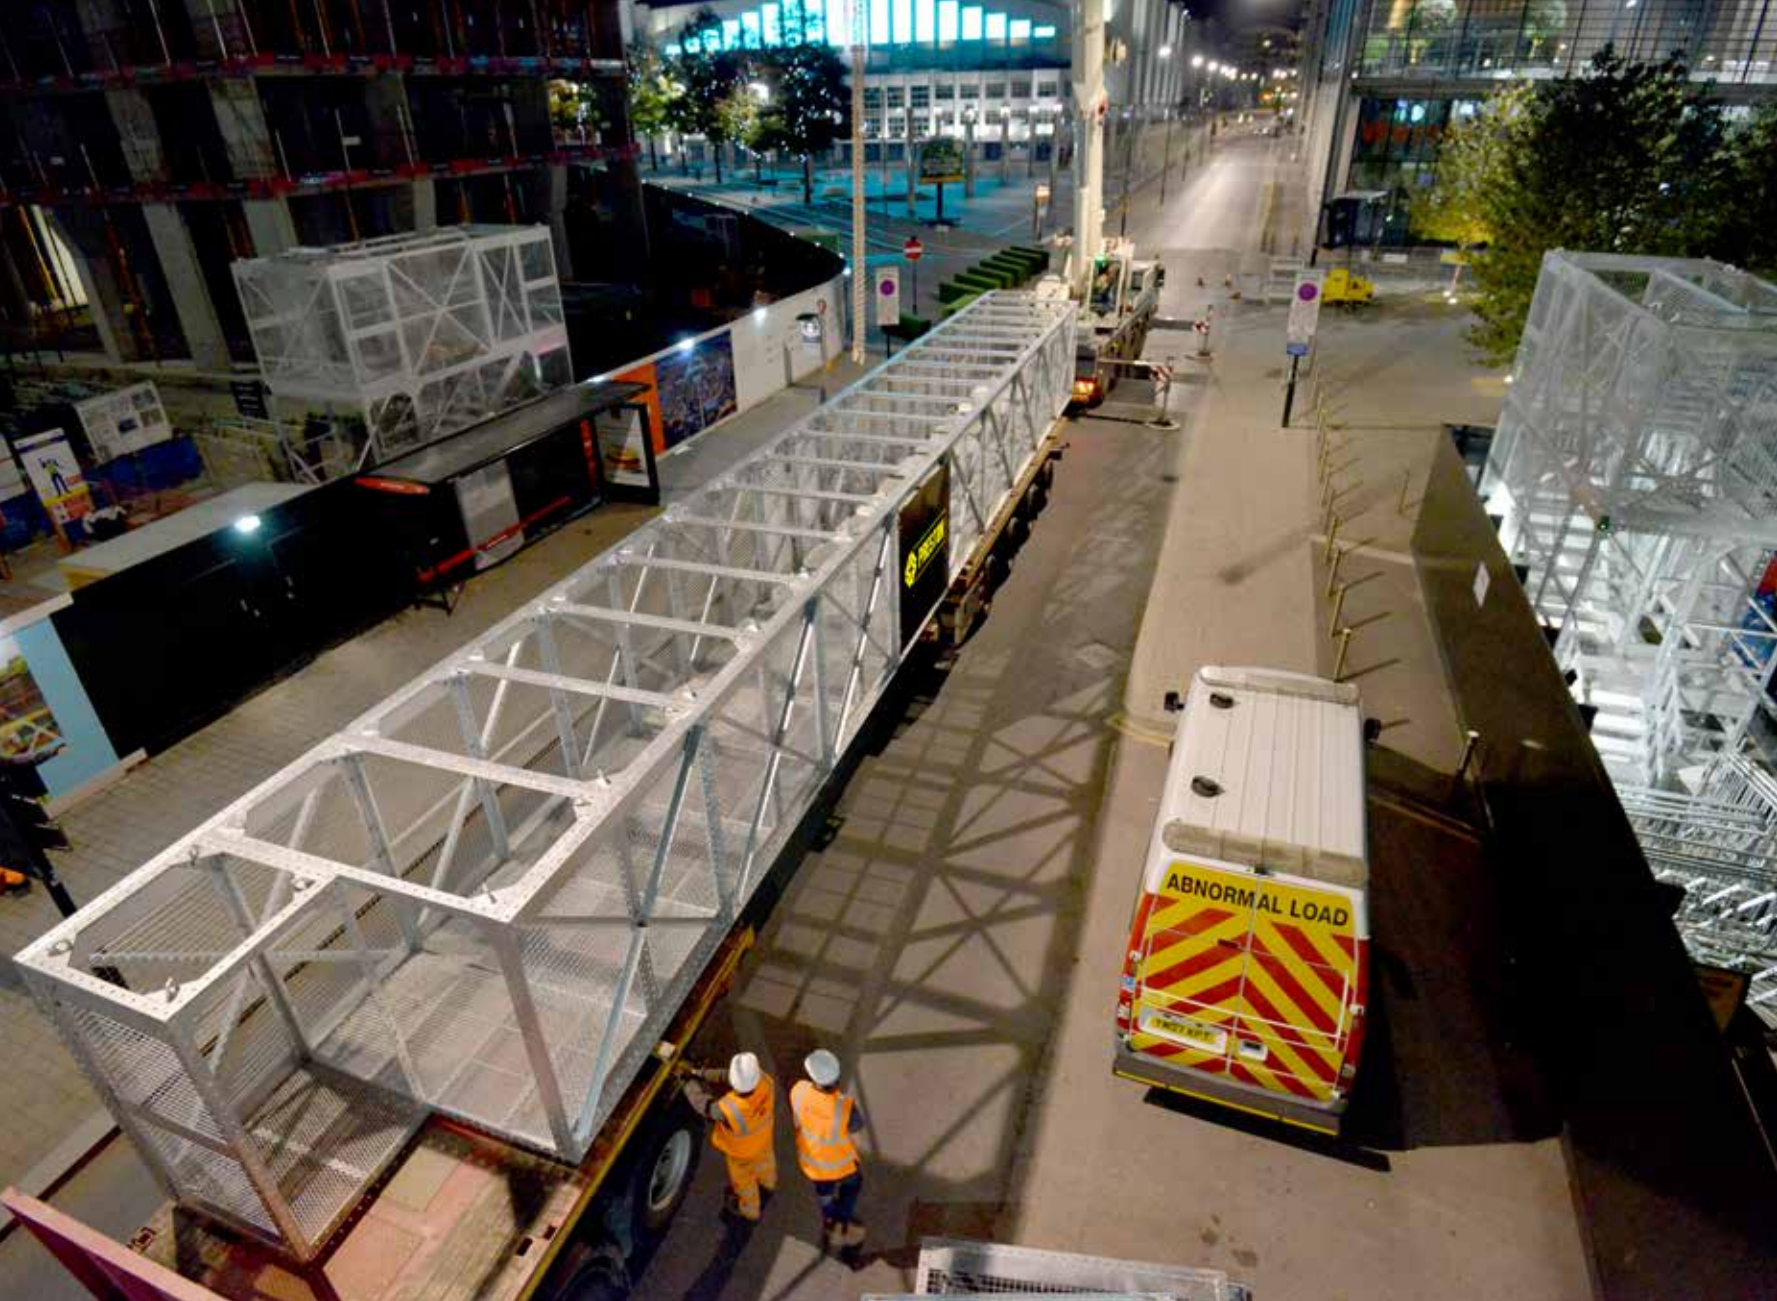

A large, pre-assembled metal structure, possibly a bridge or industrial framework, is being lifted by a crane at night. The structure is made of steel beams and mesh panels. It is suspended by a chain from a crane. Two workers in orange safety vests and white hard hats are standing in the foreground, looking at the structure. The scene is illuminated by bright lights, and a city skyline is visible in the background.
