

## NOTE SORTER

### BPS C1

The compact BPS C1 banknote processing system verifies the authenticity of banknotes, while counting and sorting them according to value and condition.

This unit combines great usability with a small footprint and high economic efficiency, which makes it the ideal choice for medium to large operations such as bank branches, cash exchange centres, casinos and large retailers.

## Features

### ➤ Continuous operation

This two-stacker machine, featuring a sorting tray and a reject compartment, can perform value count quickly and effectively, with the potential of counting 1500 banknotes per minute in piece counting mode.

### ➤ Barcode ticket scanning

The BPS C1 has the ability to scan the image of the barcode tickets and store it on the hard drive, allowing staff to have remote access to barcode ticket data.

### ➤ Compact, space saving, award winning design

A small footprint and front access make the BPS C1 the perfect choice for businesses seeking convenience and value, contained in a minimal space and presented with a modern and ergonomic design. The BPS C1 was awarded the Red Dot Award: Product Design for 2012.

### ➤ Allows for two interchangeable operators

Two people can use the same BPS C1 machine in parallel, making this unit a solid investment.
