

## NOTE RECYCLING + BANKING

# AST7008

The AST7008 is a high capacity banknote recycling unit with the addition of a deposit module for easy CIT pickup and banking.

Designed to guarantee speed, accuracy and durability with high volumes of cash, the AST7008 handles the validation, storage, dispensing and deposit of banknotes through one input pocket.

In addition it offers full security and protection against theft and hold-ups, thanks to the safe lock and time delay function.

## Features

- Counts and dispenses banknotes at a speed of 7 and 6 banknotes per second, respectively.
- Equipped with 8 recycling drums, each with a capacity of up to 700 banknotes (total= 5,600 notes).
- The banking module can be set up with either a high capacity canvas bag (10,000 notes capacity), a disposable heat-sealing bag (4,000 notes) or a disposable heat-sealing *stacking* bag (3,000 notes).
- CIMA sensor BV 5000 employs all the most advanced banknote recognition technologies: magnetic, infrared, fluorescence, ultraviolet, visible light.
- C-Link software allows for remote monitoring and management of the device in real time.
- Can be used in conjunction with EFTPOS machines, providing cashier assisted functionality and reporting.
- When paired with the Scan Coin RCS402 coin recycling system, the solution takes only minutes to complete float preparation and process end-of-day takings deposit, saving time and reducing HR costs.
- For ease of access, the frame can be completely removed so that maintenance can be performed without interrupting the teller's normal operations.

### Dimensions (depending on configuration):

Width: 440 to 495mm  
Depth: 860 to 1000mm  
Height: 670 to 737mm

**Weight:** From 165Kg to 480Kg (according to configuration)

**Capacity:** 5,600 notes (700 x 8 drums) in up to 8 denominations  
+ up to 10,000 notes banking capacity depending on configuration.
