

## NOTE DEPOSIT & COIN DISPENSING

# Ascent FireKing

With a combined note deposit unit and rolled coin dispensing unit, the Ascent FireKing is a complete cash management solution for the retail sector.

This solution dispenses floats and change requests with greater control, with the option of a 4, 6 or 8 hopper set up.

With unparalleled hardware quality and remote serviceability, the FireKing delivers everything you need to keep cash flow and cash operations running smoothly.

## Features

- Note deposit unit is daily credit capable and offers secure, role defined access for ensuring immediate access to banknotes.
- Site level reporting and self clearing capacity come as standard for easy reconciliation.
- Rolled coin dispensing unit allows users to buy change with ability to hold balance in escrow until the end of shift and set limits and time delays for transactions.
- Reinforced, appliance-grade hardware and superior internal architecture provides a robust and reliable environment for all retail cash operations.
- Read-only operating system eliminates the risk of downtime caused by disk drive failures, corruption of the operating system, and power interruption.
- Detailed transaction reporting by user, each shift provides visibility of cash handling activities.
- Can be used by an unlimited number of users, capable of storing over 100,000 transactions to support discrepancy analysis.
- Network connectivity available via Ethernet or wireless.
