

CounterCache intelligent (CCi)

The CCi securely counts, validates and stores your cash in a system designed specifically for the retail environment.

Located at the point of sale, the CCi allows staff to secure high denomination notes without leaving their working stations.

Available in two sizes, holding respectively up to 500 or 800 notes.

Features

- Allows staff to quickly skim excess notes from the till without leaving their working station
- Detects, validates and counts all circulated Australian banknotes.
- Deposited cash stored in tamper-evident bag ready to be taken to the bank.
- Real-time transaction data available via Blue-tooth, USB, Ethernet or RS232 port.
- Event Log: 8000 events logged with internal memory.
- Security: 3 level security access - outer key, key plate, and user ID.
- Fully upgradeable through network or local connection.

Dimensions:

Width 143mm
