

## Cash Exchange Machine

The Cash Exchange Machine (CEM) is a flexible and convenient self-service solution designed to provide business customers with the ability to obtain change in the form of rolled or loose coins - with the option of low denomination banknotes - without the need of pre-ordering change or queuing up in the branch or at the cash office during business hours.

The CEM solution helps banks, transport companies and large retailers automate their change dispensing requirements whilst reducing the cost and administration tasks associated with the manual handling of cash.

### FEATURES

- SVGA 15" LCD and simple user interface for ease of use
- Reliable technology ensures excellent availability and a low total cost of ownership
- Capable of dispensing up to 8 denominations of rolled coins as well as two denominations of loose coins and 4 banknote denominations in a single transaction
- 4-way note acceptor + storage cassette
- Rear-access cabinet with 5mm steel and industry standard safe options
- Silo lifting mechanism facilitates the replenishment of the machine
- Enhanced security features allow branch/cash office staff and customers to conduct transactions with minimal cash exposure. A receipt slip is issued with each transaction
- Designed to accommodate Disability Discrimination Act and ADA standards
- Various on-board monitoring systems available
- Can be connected online via XFS platform, allowing real time updates to customer accounts
